

Minutes of Meeting
DASS Team 33
Date: 12/02/2024

Time: 5:30 PM – 6:30 PM

- Try to find cheaper alternatives to AWS, as it might go over budget.
- Research on all parameters of the alternatives and share the results in the next meet.
- More work needs to be put into the Figma mock-up design.
- The home page should look relevant, currently it shows parameters which are not related to the app.
- The items page should be completed with all share, copy and delete options added as a sidebar in the page.
- The home page should be able to fit multiple (15 – 30) items to avoid scrolling.
- The images of the items should not be displayed in the home page of the app.
- Different contrasting colours should be looked at and necessary changes made in the theme of the application.
- The logo of the company should be shown at the centre of the screen in the sign-in and sign-up page.
- The sign-in, sign-up, log-in options should be like buttons, currently they look like plaintext.
- Final draft of the app should be ready by the next meeting.
- The final draft should have all relevant details of the current app and each detail should be carefully reviewed twice before presentation.
- The final draft will be shown to the CEO before the actual coding of the frontend starts on the lines of the design.
