

MINUTES OF MEETING

Date: 02-02-2024

Time: 4:30 pm – 5:00 pm

- Main aim of individual mission statements was to ensure that each team member is clear about what the project objective is.
- AWS credentials will be shared latest by 3 days.
- Architecture work must be started shortly, because it would form the foundation of how the app would work.
- The architecture should be reliable and robust.
- Usage of Flask will be reconsidered (for reliability), other alternatives like Django will also be considered.
- Exploring alternatives is encouraged, however not completely required because of the small number of users of the app – around 100.
- The mock-up design of the app will be made using Figma in the upcoming week.
