MOM (20-02-24)

5:15 to 5:40

Key Functionalities:

- **Scan:** The app will focus primarily on scanning functionality.

- **Results:** Upon scanning, the app will display the processed results of the image. These results won't be stored or retrieved in the app.

- **Simple Interface:**

  - **Home Screen:**

    - Single prominent scan button.

    - Logo at the top.

    - Dummy menu button in the top left (no functionality for now).

  - **Scan Screen:**

    - Camera for capturing pictures or videos.

    - Hold for photo, tap for video.

    - Results displayed instantly after capture.

Next Steps:

- Team to finalize the UI design by tomorrow.

- Development begins based on the finalized UI.

- Due to the app's simplicity, completion is targeted before the second week of March.

Decision:

Focus on developing a single-page app with basic scan and result display functionalities.
