Meeting Summary 11-03-24

The meeting was meant to start at 5:30, but it began at 5:48 and finished at 6:04. In the meeting, Chetan talked about a problem with showing the scanned images in the app. Aanvik asked Jagdish, the client, for the AWS login details, and Jagdish said he would give them.

Jagdish asked to see the finished app, and we said we would show it in the Friday meeting. Jagdish said we can show it using localhosts and don't need the AWS server yet.

We showed Jagdish the final SRS document. He said he would read it by tomorrow.

Chetan suggested not having the Wednesday meeting, and Jagdish was okay with this. We want to skip this meeting because we are working on finishing the app.

Chetan said that the app's backend stops working suddenly after running the scan a few times. He said using the AWS server will fix this. But Jagdish said it's fine if the app works at least three times in the presentation.
